

## Robbin Afverberg

Information Security Analyst  
Network Specialist

XPD AB

### Profil

Robbin works primarily within the technology field and has in-depth knowledge of IP based networks and mobile units. His prime focus is mobility but he's also well versed in construction, maintenance and support management of large, nationwide networks.

Robbin has a comprehensive background in IT, primarily within IT infrastructure where he recently was a leading implementer in one of Sweden's largest WAN/LAN networks. He played a key role in the implementation and was instrumental to the completion of the project and the maintenance of thousands of connected mobile units.

He has also been involved in and been essential to the development and implementation of system solutions for VPN, firewalls, Mobile Device Management (MDM) for phones and tablets and wireless networks.

Robbin has practical experience and in-depth knowledge of the extended infrastructure platform of one of Sweden's largest governmental authorities as well as an array of large cooperative projects between several of Sweden's largest authorities.

Robbin is a highly valued problem solver when it comes to network clients, network servers, as well as mobile units and their servers. He has a good eye for what needs to be done and works independently with development within the field of information technology.

As Robbin is easy-going and service minded, he works well with both customers, service providers and co-workers. Within his specialties he is often the preferred person for users to take their problems to.

## **Skills and Expertise**

### **MOBILE DEVICE MANAGEMENT SOLUTIONS (MDM)**

Robbin is very knowledgeable about different MDM solutions such as Mobile Iron and DME (by Excitor) and has extensive experience with both implementation and migration projects, as well as day-to-day operations of installations with several thousands of units.

### **NETWORKS**

Robbin is very knowledgeable about wireless, router and switching systems in both daily management and with developing new system solution architectures.

Robbin has worked with firewalls, routers, switches and MDM-solutions from a wide area of brands.

### **VPN**

IPSec gateways (different brands) and SSL VPN solutions.

### **WINDOWS**

Robbin is very familiar with UNIX/Linux and Windows Server. He is also used to manage Microsoft Windows servers on a daily basis.
